GETTING INSPIRED IN CHICAGO

The Inspired Home Show is always filled with innovative—as well as eye-catching—products, often-times from smaller, emerging or lesser-known companies. In this issue as well as our show daily you will find a plethora of them in multiple categories. Here are a few others that caught our eye. — Andrea Lillo

1 For those who need to make coffee on the go, the airline-friendly **Pakt** coffee kit offers a nesting design, as each component—including a collapsible dripper, coffee container, insulated mug, kettle and more—fits inside one another.

2 This is no ordinary corkscrew. From **Capabunga**, it features a new, patent-pending worm that is in a triangle shape rather than a circular one, requiring less effort and displacing 30 percent less cork than other corkscrews, Capabunga said.

3 The **Revolution** Cooking High-Speed 2-Slice Smart Toaster uses an intuitive full-color touchscreen display that allows users to program preferences based on food type, toasting mode and browning levels.

4 Fin-tastic. From **HIC Kitchen**, the Shark Fin Ice cube trays can be used to make eight shark fin-shaped ice cubes, candies or chocolates. FDA-approved, dishwasher safe and heat-safe to 500 degrees.

5 Here's a simple way to monitor shower time—and save water. Rotate the 5 Minute shower timer from **Kikkerland** and the countdown begins.
